07/2012 - 07/2016

GPA: 6.7/10

PROFESSIONAL SUMMARY

Senior Full Stack Developer(Java| Springboot | Angular | Microservices)

with 8+ years of experience designing scalable enterprise solutions. Proved track record in leading development from concept to deployment in Agile environments. Skilled in cloud-ready microservices, CI/CD and performance optimization. Currently seeking international opportunities with visa sponsorship to contribute to global software initiatives

EXPERIENCE HISTORY

SR. FULL STACK DEVELOPER

IBM / 08/2021 - PRESENT

- Managed and developed multiple backend microservice layers, ensuring ongoing maintenance and feature integration.
- Enhanced UI/UX using Angular's reactive components, improving user interaction speed by 30%.
- Practiced Agile methodologies, collaborating daily with clients to deliver high-quality business solutions.
- Implemented robust error handling mechanisms in backend microservices to ensure reliability and traceability of system actions.
- Led code reviews and quality initiatives, reducing production bugs by 20%.

FULL STACK DEVELOPER

ACCENTURE / 01/2020 - 08/2021

- Implemented new features and optimized existing microservices to ensure optimal performance and scalability.
- Developed standalone micro apps and conducted rigorous unit testing (Jasmine/Karma & JUnit/Mockito) and automation tests (Cypress).
- Played a key role in enhancing UI/UX for improved end-user experience.

FULL STACK DEVELOPER

YETHI CONSULTING PVT. LTD. / 05/2017 - 01/2020

- Managed UI, Business, and Data Access layers using Core Java, J2EE, JSP, JSTL, and Bootstrap for specific entities.
- Spearheaded architectural improvements, resulting in a 50% performance enhancement of the core module.
- Integrated third-party tools such as Appium and PCloudy to expand product capabilities.
- Mentored senior and junior team members to upgrade their skills and proficiency.
