

SHIVAM SHARMA

SENIOR BACKEND ENGINEER | BANGALORE, INDIA

+91 8307369808 | itsshivam95@gmail.com | [linkedin.com/in/itsshivam](https://www.linkedin.com/in/itsshivam) | github.com/ShivamSharma95 | itsshivam.net

Work Authorization: Immediate availability for EU Blue Card sponsorship / Open to relocation within Germany

PROFESSIONAL SUMMARY

. **Senior Backend Engineer** with **9+ years of experience** building scalable, high-performance enterprise applications using **Java**, **Spring Boot** and **domain-driven microservices**. Proven expertise modernising monolithic systems to cloud-native architectures, improving performance by up to 40%. Deep expertise in **Kafka**-based event-driven systems, **Redis caching**, API Gateway and Kubernetes deployments for **Insurance and Banking domains** with strong focus on clean, observable, performance-oriented engineering.

CORE SKILLS

Microservices Architecture | Distributed Systems | Event-Driven Architecture | REST APIs | API Gateway | CI/CD Automation | Kubernetes | Performance Optimization | Cloud-Native Development | Domain Driven Design (DDD) | Backend Modernization | System Design | Application Security

TECHNICAL SKILLS

Java | Spring Boot | Spring Security | REST APIs | Microservices | Kafka | Redis | PostgreSQL | Oracle | Jenkins | CI/CD Pipelines | Helm | Kubernetes | Azure | JUnit | Mockito | WireMock | Cucumber | Angular & TypeScript (Secondary) | GitHub Actions | Git | JIRA | SonarQube | Prompt Engineering | Agentic Workflows

PROFESSIONAL EXPERIENCE

Senior Backend Engineer | IBM | Bangalore, India

Aug 2021 – Present

Product Engineering – EB Quotation Tool 2.0 (Allianz Belgium)

- **Owned end-to-end development of 6+ Java Spring Boot microservices** using domain-driven design (DDD), leveraging custom LLM prompts and AI-assisted development workflows to accelerate feature delivery.
- **Enhanced backend reliability and observability** by implementing structured logging, monitoring, and error handling, reducing production defects nearly by 15%.
- **Optimized API performance and service integrations** via API Gateway optimization and Redis caching layer, decreasing response times by 25–30% and elevating system stability under high-load conditions.
- **Implemented Kafka-based async communication**, amplifying scalability and reducing latency by 20%.
- Led code reviews across a team of 7 developers, elevating code quality and enforcing engineering standards.
- **Minimized failure rates close to 25%** and improved system resilience by designing scalable microservice architectures.
- Delivered Angular-based frontend enhancements, boosting user interaction speed by 8%.
- **Optimized system availability**, cutting operational downtime by 20% via Kubernetes-based (Docker, Helm) deployments.

Backend / Full Stack Engineer | Accenture | Bangalore, India

Jan 2020 – Aug 2021

Product Engineering – Dell Support Assist Platform

- Built and enhanced scalable microservices and REST APIs, maximizing performance and maintainability.
- **Optimized backend API response times by 10%** through code refactoring and database interactions, enhancing application scalability.
- Expanded automated tests (JUnit, Mockito, Cypress), elevating test coverage by 30% and cutting down regression issues by over 15%.
- Delivered micro-applications and drove end-to-end feature delivery, optimizing release cycle time by 20%.

Software Engineer (Backend-Focused) | Yethi Consulting Pvt. Ltd. | Bangalore, India

May 2017 – Jan 2020

Product Engineering – Test Automation Platform (Tenjin)

- **Led architectural and performance improvements** of a core module, achieving nearly 40% performance enhancement.
- **Expanded test coverage by over 30%** by integrating third-party tools and services.
- Increased team productivity and code quality in the range of 10–15% through mentoring developers.

EDUCATION & CERTIFICATIONS

Master’s Degree Computer Application (Part-Time) University of Mysore	2021 – 2025
Bachelor’s Degree Electronics & Instrumentation MJP Rohilkhand University	2012 – 2016
Microsoft Certified: Azure Fundamentals Microsoft,	Jan 2025
Enterprise Design Thinking Practitioner IBM	Aug 2025

LANGUAGES

English (Professional / C1), German (A1/A2 – actively enrolled in classes), Hindi (Native)
